

Struktur:

- Intro

- └ who, why
- └ columns
- └ overview (rest of prüf)

- Preprocessing

- └ old preprocessing
 - └ what we took, what we re-did
 - └ why we scraped
 - (old code, package versions, eval resulted in unsatisfying quality/adaptability)
- └ NEW Preprocessing
 - └ modular code, faster prototyping

- Modeling

- └ Targets
 - └ binary (use/not use)
 - └ categories
 - └ location
 - └ specific diagnosis
 - └ model choices (which ones, why)

First results, issues

- oversampling (dec tree)

- imbalanced dataset (idiopathic)

Next steps / Conclusion

- Hyperparameter tuning

- Forward/Backward selection

- Feature importance extraction

- Documentation
